Question 1

Max. score: 20.00

Sum of squares

Write a program to print sum of squares of N Natural numbers

Sample input	Sample output
5	55

Note:

Your code must be able to print the sample output from the

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
n=int(input())
i=1
s=0
while i<=n:
    s=s+(i*i)
    i+=1
print(s)
```

Question 2

Max. score: 30.00

Factors

Write a program to print factors of a given number

Sample input

```
4
```

Sample output

```
1 2 4
```

Note:

Your code must be able to print the sample output from the provided sample

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
n=int(input())
i=1
while i<=n:
    if n%i==0:
        print(i,end=" ")
    i+=1
```

Question 3

Max. score: 30.00

Sum of factors

Write a program to print sum of factors of a given number

Sample input	Sample output
5	6

Note:

Python 3.8 (python 3.8.10)

Auto-complete

```
n=int(input())
i=1
s=0
while i<=n:
    if n%i==0:
        s+=i
    i+=1
print(s)
```

umkaramsubbaraju2@g...

Question 4

Max. score: 30.00

Highest Common Factor

print the Highest Common Factor for given 2 numbers

Sample input	Sample output
2 4	2

Note:

Your code must be able to print the sample output from the provided sample input. However

Python 3.8 (python 3.8.10)

Auto-complete ready!

```
a=int(input())
b=int(input())
hcf=0
i=1
j=1
while i<=a and j<=b:
    if a%i==0 and b%j==0:
        hcf=i
    i+=1
    j+=1
print(hcf)
```

omkaramsubbaraju2@g...

Question 5

Max. score: 20.00

N natural

Write a program to print N natural numbers using While loop

Sample input

```
5
```

Sample output

```
1 2 3 4 5
```

Note:

Your code must be able to print the sample output from the provided sample input. However, your code is run against multiple hidden test cases. Therefore, your code must pass

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
n=int(input())
i=1
while i<=n:
    print(i,end=" ")
    i+=1
```

Question 6

Max. score: 30.00

Hello world N times

print Hello World for given number of times

Sample input

```
3
```

Sample output

```
Hello World
Hello World
Hello World
```

Note:

Your code must be able to print the sample output from the provided sample input. However, your code is run against multiple hidden test cases. Therefore, your code must pass these hidden test cases to solve the problem statement.

Limits

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
i=int(input())
s=1
while i>=s:
    print('Hello World')
    i-=1
```

Question 7

Max. score: 30.00

Even factors

Write a program to print even factors of a given number

Sample input	Sample output
10	2 10

Note:

Python 3.8 (python 3.8.10)

Auto-complete ready!

```
n=int(input())
i=1
while i<=n:
    if n%i==0:
        if i%2==0:
            print(i,end=" ")
    i+=1
```

omkaram

Question 8

Max. score: 30.00

Perfect Number

Write a program to print "Perfect" if the given number is a perfect number else print "No"

Sample input	Sample output
6	Yes

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
s=int(input())
a=1
t=0
while a<s:
    if s%a==0:
        t+=a
    a+=1
if t==s:
    print('Yes')
else:
    print('No')
```

Note:

Your code must be able to print the sample output from the

Question 9

Max. score: 30.00

perfect squares in given range

print perfect squares in the given range

Sample input

```
10
```

Sample output

```
1 4 9
```

Note:

Your code must be able to print the sample output from the provided sample input. However, your code is run against multiple hidden test cases. Therefore, your code must

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
n=int(input())
i=1
s=0
while i<=n:
    s=i*i
    if s<=n:
        print(s,end=" ")
    i+=1
```

omkaramsubbaraju2@g...

Question 10

Max. score: 30.00

Odd numbers and count

Write a program to print Odd numbers and their count in given range by using While loop

Sample input

```
10
20
```

Sample output

```
11 13 15 17 19
5
```

Note:

Your code must be able to print the sample output from the provided sample input. However, your code is run against multiple hidden test cases. Therefore, your code must pass these hidden test cases to solve the problem statement.

Limits

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
a=int(input())
b=int(input())
if a>b:
    i=b
    c=0
    while i<=a:
        if i%2==1:
            c+=1
            print(i,end=" ")
        i+=1
    print()
    print(c)
else:
    i=a
    c=0
    while i<=b:
        if i%2!=0:
            c=c+1
            print(i,end=' ')
        i=i+1
    print()
    print(c)
```

Question 11

Max. score: 30.00

Even or Prime

If the given no. is even, print 1

prime. print 0

else print -1 .

Note : consider '2' as even no. only

Sample input

```
7
```

Sample output

```
0
```

Note:

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
n=int(input())
i=1
s=n
c=0
while i<=n:
    if n%i==0:
        c+=1
    i+=1
if s%2==0 or s==2:
    print('1')
elif c==2:
    print('0')
else:
    print('-1')
```

Question 12

Max. score: 20.00

Factorial!

Print the factorial of given number

Sample input	Sample output
6	720

Explanation

Factorial

Python 3 (python 3.10)

Auto-complete ready!

```python
n=int(input())
i=1
f=1
while i<=n:
    f=f*i
    i+=1
print(f)
```

Question 13 Max. score: 30.00

Prime Number

Write a program to print "Yes" if the given number is prime else print "No". If the given number is Zero print "It is zero".

Sample input	Sample output
7	Yes

Python 3.8 (python 3.8.10) Auto-complete ready!

```
n=int(input())
i=1
c=0
while i<=n:
    if n%i==0:
        c+=1
    i+=1
if c==2:
    print('Yes')
elif n==0:
    print('It is zero')
else:
    print('No')
```

Question 14

Max. score: 30.00

Factors count

Write a program to print "Yes" if factors count is odd else print "No"

Sample input	Sample output
4	Yes

Note:

Your code must be able to print the sample output from the provided sample input. However, your code is run against multiple hidden test cases. Therefore, your code must pass these hidden test cases to solve the problem statement.

Python 3.8 (python 3.8.10)

Auto-complete ready!

Autosaved

```
n=int(input())
i=1
c=0
while i<=n:
    if n%i==0:
        c+=1
    i+=1
if c%2==1:
    print('Yes')
else:
    print('No')
```

Question 15   Max. score: 20.00

Reverse of natural numbers

Write a program to print reverse of N natural numbers

Sample input

```
5
```

Sample output

```
5 4 3 2 1
```

Note:

Your code must be able to print the sample output from the provided sample input. However, your code is run against multiple hidden test cases. Therefore, your code must pass these hidden test cases to solve the problem statement.

Python 3.8 (python 3.8.10)   Auto-complete ready!

```
n=int(input())
i=n
while i>=1:
    print(i,end=" ")
    i-=1
```

Question 16

Max. score: 30.00

print N even numbers

print N even numbers

Sample input

```
4
```

Sample output

```
2 4 6 8
```

Note:

Your code must be able to print the sample output from the provided sample input. However, your code is run against multiple hidden test cases. Therefore, your code must pass these hidden test cases to solve the problem statement.

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
n=int(input())
i=1
while i<=n*2:
    if i%2==0:
        print(i,end=' ')
    i+=1
```

Question 17

Max. score: 30.00

Even upto N

Write a program to print even numbers upto N.

Sample input

```
5
```

Sample output

```
2 4
```

Note:

Your code must be able to print the sample output from the

Python 3.8 (python 3.8.10)

Auto-complete ready!

```python
n=int(input())
i=1
while i<=n:
    if i%2==0:
        print(i,end=' ')
    i+=1
```

Question 18

Max. score: 30.00

N even

Write a program to print N even numbers separated by commas

Sample input

```
5
```

Sample output

```
2,4,6,8,10
```

Note:

Your code must be able to print the sample output from the

Python 3.8 (python 3.8.10)

Auto-complete ready!

```
n=int(input())
i=1
while i<=n*2:
    if i%2==0 and i<n*2:
        print(i,end=',')
    if i==n*2:
        print(i)
    i+=1
```

Question 19

Max. score: 30.00

Upto N natural by ,

Write a program to print upto N natural numbers seperated by a comma

Sample input

```
10
```

Sample output

```
1,2,3,4,5,6,7,8,9,10
```

Note:

Your code must be able to print the sample output from the provided sample input. However, your code is run against multiple hidden test cases. Therefore, your code must pass these hidden test

Python 3.8 (python 3.8.10)

Auto-complete ready!

n=int(input())
i=1
while i<=n:
    if i<n:
        print(i,end=',')
    if i==n:
        print(i)
    i+=1
```

omkaramsubbaraju2@g...

Question 20

Max. score: 30.00

print natural numbers and their sum

print the natural numbers upto N and their sum in next line

Sample input

```
4
```

Sample output

```
1 2 3 4
10
```

Note:

Your code must be able to print the sample output from the provided sample input. However, your code is run against multiple hidden test cases. Therefore, your code must pass these hidden test cases to solve the problem statement.

Limits

Python 3.8 (python 3.8.10)

Auto-complete ready!

Auto

```python
n=int(input())
i=1
s=0
while i<=n:
    s=s+i
    print(i,end=' ')
    i+=1
print()
print(s)
```
